## PROFESSIONAL EXPERIENCE

### Ingram Content Group—Software Engineer

Worked full time in a fast-paced AGILE environment delivering enterprise level software.

Jun 2022 - May 2024

- Handled deployments for all environments through Azure pipelines
- Created pixel perfect UI features/designs in Typescript using the Angular framework
- Used Angular to implement various different charts, tables, and diagrams to help users better visualize their data
- Gained foundational knowledge of Docker and Kubernetes with hands on experience
- Delivered efficient API solutions with Ruby on Rails, querying against a vast Vertica database
- Supported three applications used as reporting tools for our customers using the best practices and design patterns.

## TECHNICAL EXPERIENCE

### Software Engineer

#### CookSystems FastTrack Program | April 2025- May 2025

*Full Stack program focusing on Java with Spring, and Angular with Javascript. Within this program we focus not only on the technicals, but building our interpersonal skills as professionals.*

- Built many projects on both Server, Client, and Full Stack
- Used both OOP and Functional programming patterns and best practices
- Worked on Career Readiness building interpersonal skills to be a better professional
- Built both individual and team projects, focusing on collaboration and efficiency within a team
- Learned how to navigate the professional world better to enhance our ability to collaborate.

## ABOUT ME

To me, coding is a passion. I was exposed to coding in high school, starting with a simple “hello world” to the terminal. Since then I have come to love coding, and continue to learn more every day. I love to solve problems, learn how things work, and I also see coding as a way to express myself. Some of my other interests are astronomy, physics, and coffee.

## SKILLS

HTML, CSS, JavaScript, Typescript, React, Angular, Ruby on Rails, Java, Spring Boot, Python, Django, PostgreSQL, SQLite, Vertica, Git, Github, Linux, CI/CD, Docker, Kubernetes

## PROJECTS

### Twitter API clone — [View Code](#)

- A RESTful API built using Java, Spring Boot, JPA, and PostgreSQL. Exposes endpoints allowing for full CRUD functionality.

## **Software Developer**

### **Nashville Software School | Sept 2021- March 2022**

*Intensive full-time, six months software development bootcamp focusing on Python/Django development fundamentals and problem solving. The final three months of the program being executed in a simulated company environment with SCRUM methodology.*

- Daily hands on application of OOP fundamentals through group and individual projects
- Created single page applications in JavaScript, as well as in the React framework
- Project management/tracking with GitHub project boards and issue tracking
- Source code/version control with Git/GitHub
- Solution Design: white-boarding and wireframes
- Leveraged Django for creating and editing server-generated web applications
- Created RESTful API's with Django REST framework
- Retrieved and stored database information with SQLite
- Practiced testing with Python's unit test framework

## **EDUCATION**

### **Cook Systems FastTrack Program**

April 2025 - May 2025

Full Stack Program

### **Nashville Software School, Nashville— *Certificate***

SEP 2021 - May 2022

Full Stack Web Development Bootcamp

### **Franklin Christian Academy, Franklin**

AUG 2019 - MAY 2021
